

# Hands-on Lab: Create Tables using SQL Scripts and Load Data into Tables in MySQL using phpMyAdmin

Estimated time needed: 20 minutes

In this lab, you will learn how to create tables and load data in the MySQL database service using the phpMyAdmin graphical user interface (GUI) tool.

## Software Used in this Lab

In this lab, you will use MySQL. MySQL is a Relational Database Management System (RDBMS) designed to efficiently store, manipulate, and retrieve data.

To complete this lab you will utilize MySQL relational database service available as part of IBM Skills Network Labs (SN Labs) Cloud IDE. SN Labs is a virtual lab environment used in this course.

### Database Used in this Lab

The database used in this lab is an internal database. You will be working on a sample HR database. This HR database schema consists of 5 tables called **EMPLOYEES**, **JOB\_HISTORY**, **JOBS**, **DEPARTMENTS** and **LOCATIONS**. Each table has a few rows of sample data. The following diagram shows the tables for the HR database:

#### SAMPLE HR DATABASE TABLES

EMP_ID	F_NAME	L_NAME	SSN	B_DAT	E	SEX	ADDRESS		JOB_ID	SALAF	RY I	MANAGE	R_ID	DEP_ID
E1001	John	Thomas	1234	56 1976-0	01-09	М	5631 Rice, O	akPark,IL	100	10000	00 3	30001		2
E1002	Alice	James	1234	57 1972-0	07-31	F	980 Berry In	, Elgin,IL	200	80000	) 3	30002		5
E1003	Steve	Wells	1234	58 1980-	08-10	М	291 Springs,	Gary,IL	300	50000	) 3	30002		5
JOB_HISTO	ORY					J	OBS							
EMPL_ID	START_D	START_DATE J		DEPT_	ID	JOB_IDENT		JOB_TITLE		MIN_SALARY		MA	X_SALAR	
E1001	2000-01	2000-01-30 100		2		10	00 Sr. Arch		itect 6		60000	60000 10		000
E1002	2010-08-16		200	5	5		200 Sr.Softv		wareDeveloper		60000		800	00
E1003	2016-08	-10	300	5		30	00	Jr.Softw		vareDeveloper		40000		00
DEPARTMI	ENTS						LOCATIO	ONS						
DEPT_ID_DE	P DEP_NA	DEP_NAME		MANAGER_ID L			LOCT_ID		DEP	P_ID_LOC				
2	Architec	Architect Group		30001			L0001		2	2				
5	Software	Software Development		30002			L0002		5					
7	Design T	Design Team		30003			L0003		7	7				
5	Software	Software		30004 L000										

## **Objectives**

After completing this lab, you will be able to use phpMyAdmin with MySQL to:

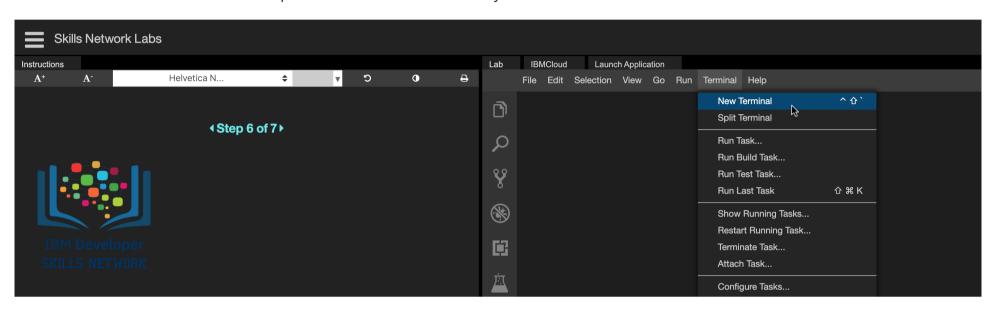

- Create a database.
- Create tables using SQL scripts
- Load data into tables

#### **Exercise**

In this exercise through different tasks, you will learn how to create tables and load data in the MySQL database service using the phpMyAdmin graphical user interface (GUI) tool.

#### Task A: Create a database

1. Go to **Terminal** > **New Terminal** to open a terminal from the side by side launched Cloud IDE.

2. Start MySQL service session in the Cloud IDE using the command below in the terminal. Find your MySQL service session password from the highlighted location of the terminal shown in the image below. Note down your MySQL service session password because you may need to use it later in the lab.

```
theia@theiadocker-sandipsahajo:/home/project$ start_mysql
Starting your MySQL database....
This process can take up to a minute.

MySQL database started, waiting for all services to be ready....

Your MySQL database is now ready to use and available with username: root password: MTY5MTUtc2FuZGlw
```

3. Copy your phpMyAdmin weblink from the highlighted location of the terminal shown in the image below. Past it into the address bar in a new tab of your web browser. This will open the phpMyAdmin tool.

• The browser at: https://sandipsahajo-8080.theiadocker-27.proxy.cognitiveclass.ai

CommandLine: mysql --host=127.0.0.1 --port=3306 --user=root --password=MTY5MTUtc2FuZGlw

```
theia@theiadocker-sandipsahajo:/home/project$ start_mysql
Starting your MySQL database...
This process can take up to a minute.

MySQL database started, waiting for all services to be ready....

Your MySQL database is now ready to use and available with username: root password: MTY5MTUtc2FuZGlw

You can access your MySQL database via:

• The browser at: https://sandipsahajo-8080.theiadocker-27.proxy.cognitiveclass.ai

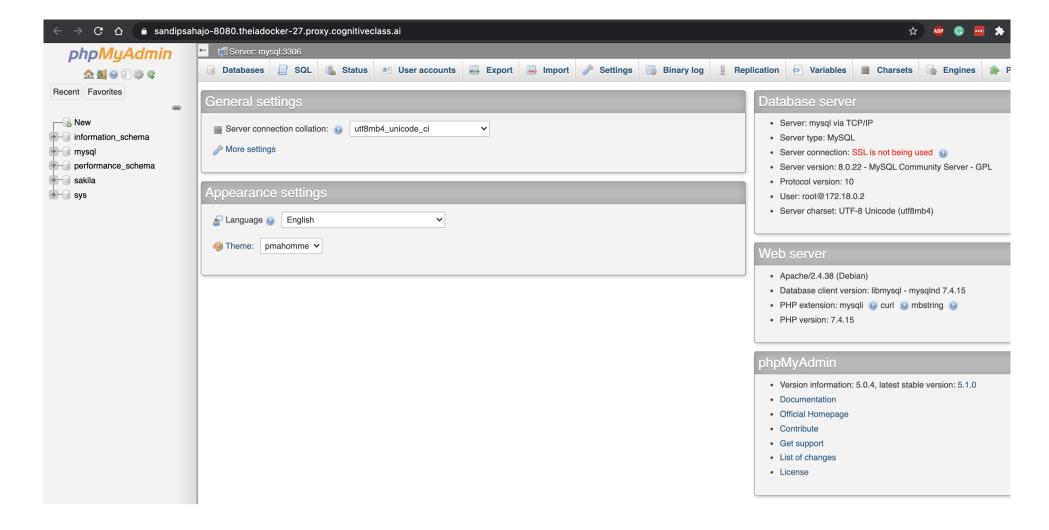

• CommandLine: mysql --host=127.0.0.1 --port=3306 --user=root --password=MTY5MTUtc2FuZGlw

theia@theiadocker-sandipsahajo:/home/project$
```

4. You will see the phpMyAdmin GUI tool.

You can access your MySQL database via:

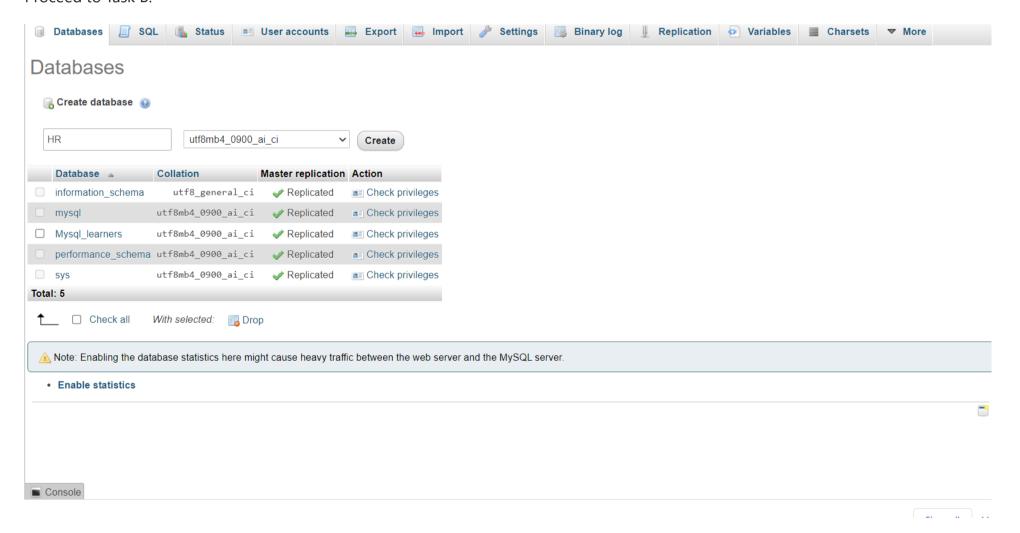

theia@theiadocker-sandipsahajo:/home/project\$

5. In the tree-view, click **New** to create a new empty database. Then enter **HR** as the name of the database and click **Create**.

The encoding will be left as **utf8mb4\_0900\_ai\_ci**. UTF-8 is the most commonly used character encoding for content or data.

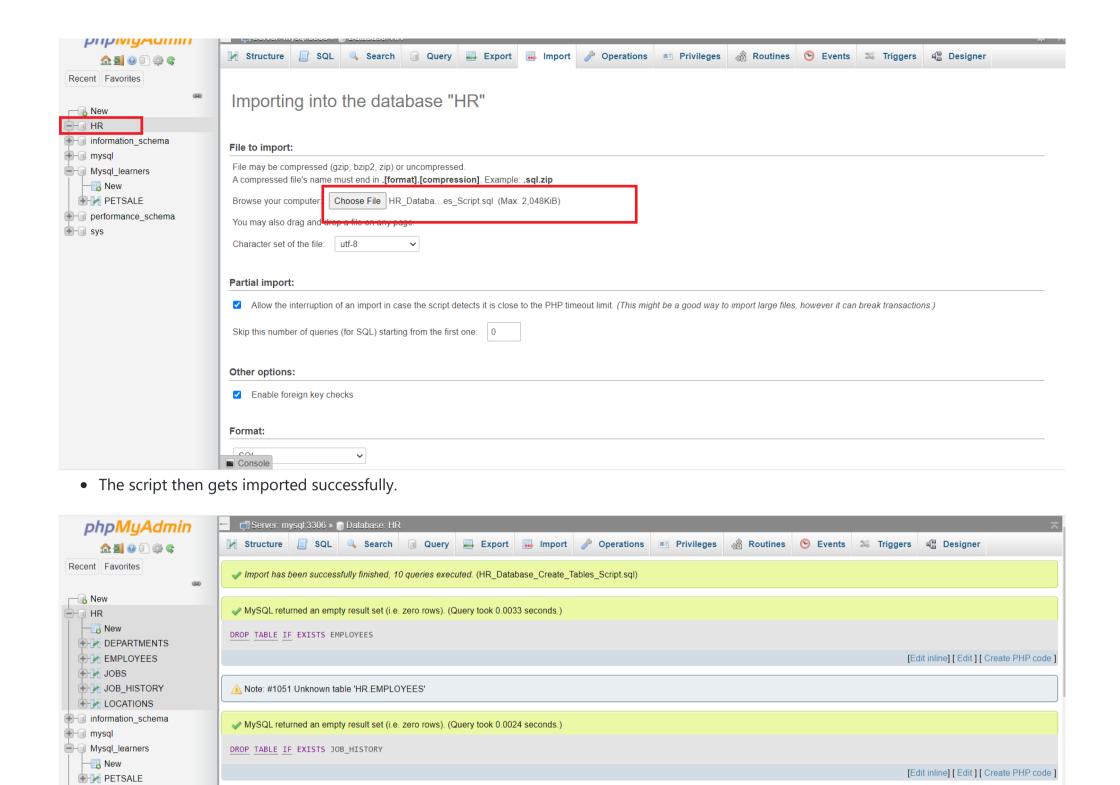

Proceed to Task B.

## **Exercise 1: Create tables using SQL scripts**

In this exercise, you will learn how to execute a script containing the CREATE TABLE commands for all the tables rather than create each table manually by typing the DDL commands in the SQL editor.

- 1. Download the script file to your computer:
  - HR Database Create Tables Script.sql
- Select the HR database. Later click on the Import tab.
- Click on **choose file**. Browse for the file and upload it .
- Later scroll down and click on **Go**.

Click on any of the tables and you will see its Table Definition (that is, its list of columns, data types, etc).

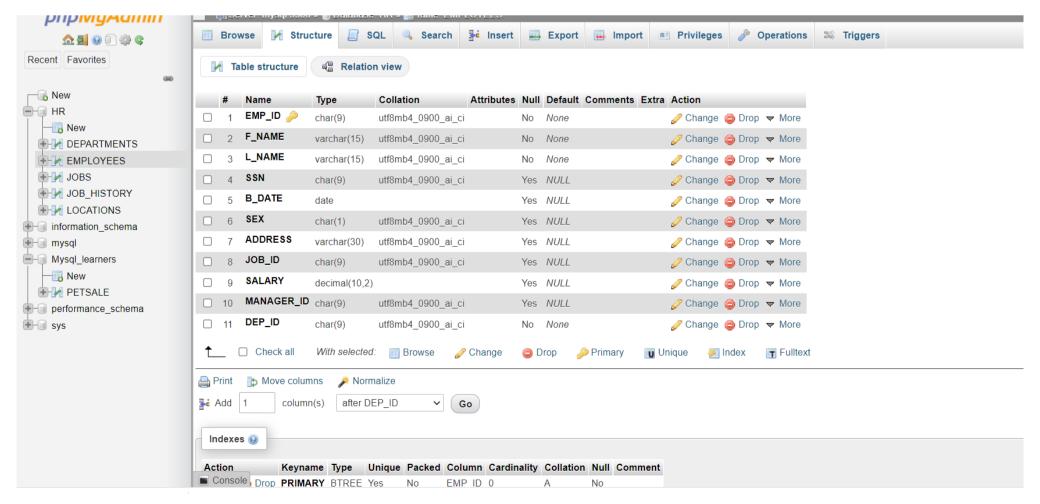

▲ Note: #1051 Unknown table 'HR.JOB\_HISTORY'

DROP TABLE IF EXISTS JOBS

A Note: #1051 Unknown table 'HR.JOBS'

MySQL returned an empty result set (i.e. zero rows). (Query took 0.0051 seconds.)

Console returned an empty result set (i.e. zero rows). (Query took 0.0037 seconds.)

[Edit inline] [ Edit ] [ Create PHP code ]

**Exercise 2: Load data into tables** 

- performance\_schema

sys

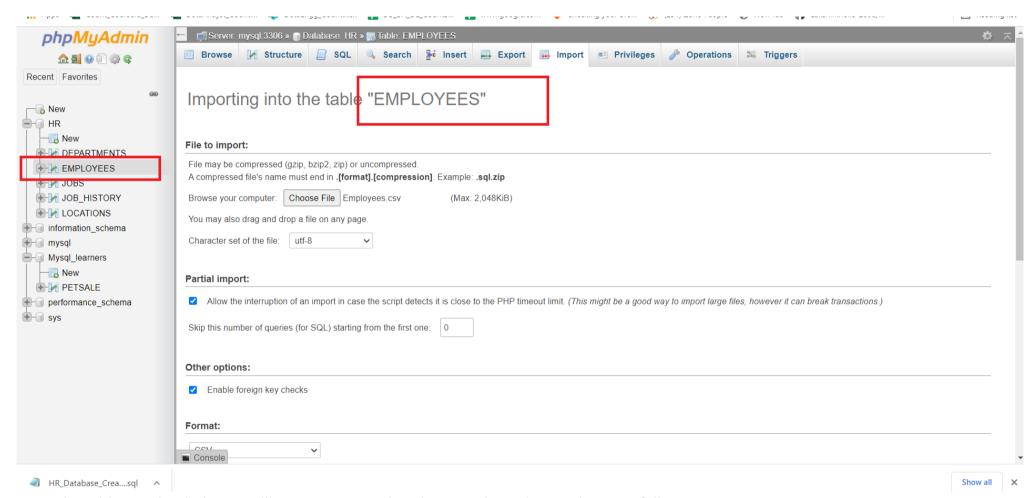

In this exercise, you will learn how data can be loaded into Db2. You could manually insert each row into the table one by one, but that would take a long time. Instead, Db2 (and almost every other database) allows you to load data from .CSV files.

The steps below explain the process of loading data into the tables you created earlier in exercise 1.

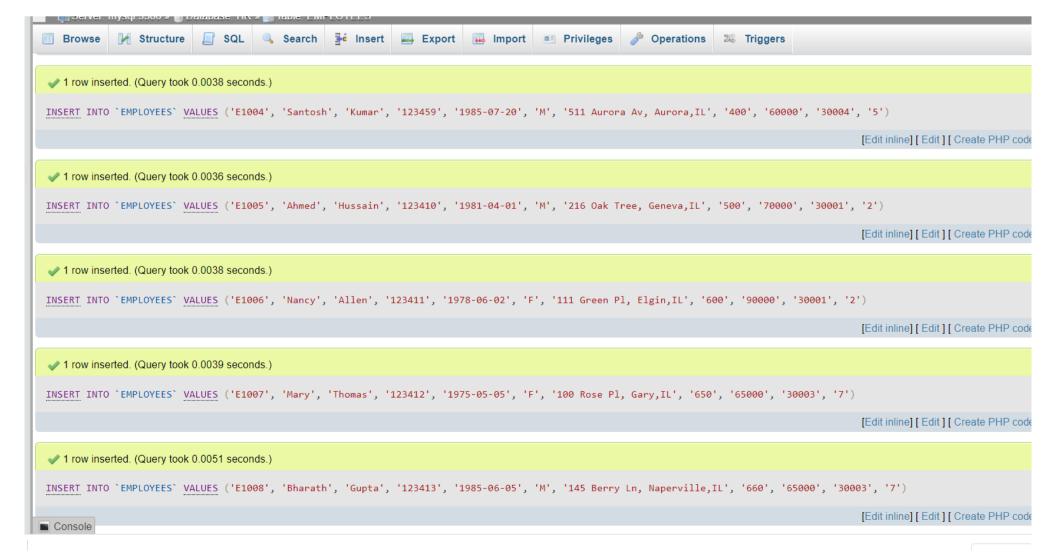

- 1. Download the 5 .csv files below to your local computer:
  - o <u>Departments.csv</u>
  - <u>Employees.csv</u>
  - Jobs.csv
  - Locations.csv
  - JobsHistory.csv

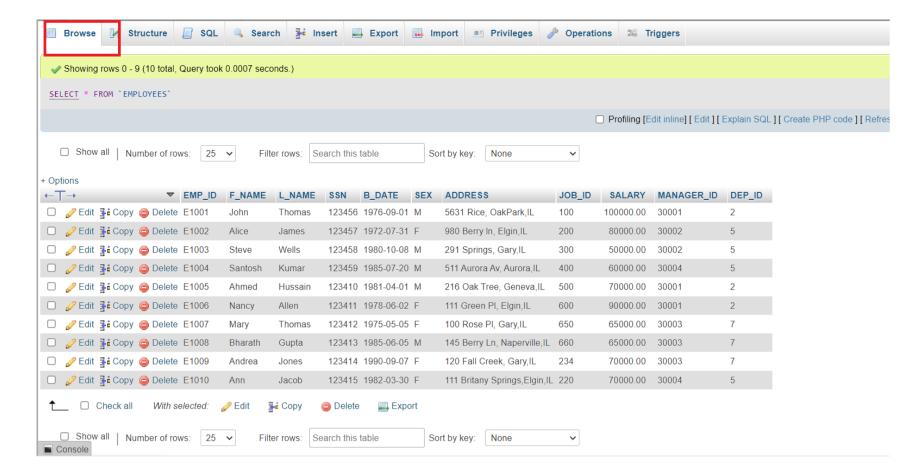

To load each table do the following steps.

- Select each table .
- Click on Import tab.
- Select the csv file and click on Go to load the csv file.

Once the tables are loaded, you will get a message that the records are inserted successfully.

Congratulations! You have completed this lab, and you are ready for the next topic.
